"It is an EFTAL® foundation."

Our firm we established in İNEGÖL in 2000 with the title of EFTAL SOFA- EFTAL GÜLLÜ; is active in furniture sector by wholesale and by retail as sofa manufacturer and has adopted growing by taking strong and confident steps as a main principle. Our firm has continued its activities as furniture and sofa manufacturer abroad from 2008 to 2020. Then at the beginning of 2021, we returned from abroad and started our activities as **INMOBED MATTRESS GROUP** in Spring Bed, Storage Beds, and Headboards sector. It has always given particular importance to customer satisfaction it gained on the basis of its business ethics and commercial ethics in its relations up to now. Our company; that has taken this support and trust from you; our dear friends and customers continues on its way with a better quality and service understanding in its perspective.

With kind regards,
EFTAL GÜLLÜ

INMOBED
SLEEPER

SENSOR- FITTED LED
It can be applied to all storage beds.

Raise your standards with 34 cm mattress height of Silver.

You will rest up from the exhaustion of the day and wake up to an energetic morning thanks to the rich filling materials, pocket spring and woven fabric we use in its production.

Extra Height

Feel yourself above the clouds thanks to this bed specially designed with its height of 34 cm. Thanks to its authentic filling materials used in it, enjoy sleeping high up for years.

Silver mattress that supports the body thanks to its comfort-enhancing sponge pad and that reduces the pressure offers an excellent alternative for the ones who look for a both durable and healthy mattress.

MATTRESS SIZES
150x200 cm
160x200 cm
180x200 cm
200x200 cm

Pocket Spring System

The springs produced in our factory are combined in appropriate sizes by being packed one by one and individual packaging ensures sound insulation between the springs and allows them to move independently from each other. Thanks to the springs that move independently, every point of the spine is fully supported and effect of the spouses' movements on each other during sleep is minimized.

Visco Sponge Layer

Visco sponge, which has an open-cell structure where air can move freely, takes your body shape and maximizes sleep comfort. The sponge that has a dense and elastic structure changes form according to the pressure applied on it. It is soft when you lie on it, but when you get up; it takes its old solid form again.
